

Project Team

[Submit Assignment](#)

Due Thursday by 11:59pm **Points** 0.5 **Submitting** a text entry box or a file upload **Available** after Jan 5 at 12am

Each of project team should have "at most" three members. Although you can work alone, it is not recommended as the project will be really hard and huge.

When you work together, it is always a good idea to assign roles to each person. Here is some guide.

For this project, we can have the following roles.

- I/O Person: Handles all inputs from the user and displays to the screen
- Op Code Person: Handles decoding the OP-Codes and passing EA information to EA person
- EA Person: Decodes Effective Addresses

Each role can be changed as the project goes, and it is totally fine. But, at least start with some roles.

Also, you have to meet regularly for this project. So please schedule your meetings in advance.

=====

What to submit:

Please submit a file (The file name should be "<team_name>.docx". For example if your team name is "theteam", then your file should be, theteam.docx) per each team (means only one of your team members submit the file) including :

- Team name:
- Team members and roles for each member:
- Tentative meeting time (regular): For example, every Monday 3:00 to 4:00
